The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/511,928	Applicant(s) JANSSEN ET AL.	
	Examiner Melvin A. Cartagena	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3 and 5-12 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,255,826 to Ranalletta et al.

Ranalletta show a one way valve for discharging flow able material from container 112 of reducible volume, as seen in Figs. 2A and 9, having an independent valve seat 110 positioned in the neck 116 of the container, a body 118a with through holes 130, a cylindrical valve seat 18j projecting axially to an exit opening B with a tamper section 24d, an elastic seal 124 with an annular section covering the holes 130, a sleeve-like section surrounding the projection at a radial distance except at the valve seat, a valve seat 125 with circular cylindrical shape and a non-removable cap 120.

In reference to the functional language of the claim, see column 4, lines 50-66.

In reference to claim 7, the upper edge of the projection 18j is arranged in the same manner as the projection disclosed by the applicant.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3754

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2,628,004 to T. F. Schlicksupp in view of US 5,255,826 to Ranalletta et al.

Ranalletta show all claimed features as discussed above except for a sterilization means arranged in the product flow path. Sawan et al. show a filter coated with a bactericidal element that is located in the flow path of the product to be dispensed. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Ranalletta to include a bactericidal element in the flow path of the product as taught by Sawan et al. to provide a liquid dispenser that can be used for dispensing preservative-free liquid medicaments that are required to be sterile.

In reference to claim 16, see column 9, lines 1-4.

Response to Arguments

5. Applicant's arguments with respect to claims 1-3 and 5-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3754

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
